

"One Stop Security Solution"

TransAfrica2000 [HOME GROWN SECURITY PORTFOLIO]

200

SAFETY AND SECURITY IS OUR INTEGRITY

AFRICONCONSULT

[LETTER OF INTRODUCTION]

Dear Sir/Madam

TransAfrica2000 is an established security company locally as well as internationally since 2002 in Ghana, West Africa and the UK, that provides electronic as well as Digital Manpower security solutions to meet your business needs.

We offer much more than the traditional security watch. We provide a high standard variety of security services that includes consultancy, electronic surveillance systems (CCTV), access control systems, alarm systems, manpower personnel and a variety of anti theft electronic gadgets. We also improve upon an already installed security system.

In order for us to design, supply and install a well structured security system our technical team will conduct a survey at your premise on a given date. The survey will determine the choice and type of security need that is required by your business. The survey will also help us to advice on a variety of security issues. Lastly, the survey conducted is free of charge.

We look forward to working with you.

Syl Juxon Smith - BSc
[Integrated Business Security Consult Africa]

The scope of **TransAfrica2000** operation is really quite broad. We can accomplish most things. The reputation of our business has been built on our ability to collate all the right and necessary resources to correctly design, manage and complete a project.

We firmly believe that it is the careful identification of the clients real needs, coupled to the employment of expertise that precisely matches the operational criteria - but more importantly it is the efficient management of the resources - that ensures real success.

What is the essence of **TransAfrica2000** Business Philosophy?

- ▶ Build long term strategic partnerships with our clients
- ▶ Develop common sense, cost effective, technical solutions
- ▶ Apply best practices at all levels of operation
- ▶ Operate an open book, full disclosure policy
- ▶ Develop & train local workforce to be self-sufficient
- ▶ Introduce innovative solutions in line with local conditions & global security trends and developments.

GHANA HOMELAND SOLUTION

DIGITAL AND PHYSICAL SECURITY IN CONVERGEANCE

INTEGRATED MANNED & TOUR SECURITY SOLUTIONS

Overview

Our Homeland Security Integrated Concept is in line with global Risk and Threat dynamics ever growing needing comprehensive and qualifies approach. Our turnkey concept in Safety and Security, Response and Emergency Management Solutions is designed to provide in-depth services and knowledge with technical skills pertaining to an all-hazards approach for homeland preparedness and consequence management meeting Ghana`s needs as it continues to set the pace in been Africa`s Gateway, placing a whole lot of responsibilities in maintaining its integrity.

Description

Recent national and world events have resulted in a demand for hundreds of thousands of newly trained life safety and protective service sector employees in manned Guarding, operational, supervisory administrative and VIP Security in convergence. TransAfrica2000 in strategic partnership with our "Ghanaians" International and local specialists especially in modern manned Guarding operations, integrated with digital solutions like CCTV, Access Control, Biometrics and Alarm System is responding to this operational and training needs building human resource capacity base for DIGITAL SECURITY.

We are offering strategic **BOOTCAMP TRAINING FACILITIES** to all personnel and clients on requests designed to provide in-depth knowledge, technical skills and security industry "best practices" pertaining to emergency management and new security officer training programs that include corporate and organizational life safety and security forensic auditing solutions with technology.

Completing our rigorous from **FOUNDATION COURSES TO ADVANCE** will qualify our staff and clients own personnel meeting life safety and protective service employment positions in the following sectors:

Corporate, Business, Commercial and Government Security

Private Security; commercial and retail loss prevention; hospitality, gaming and entertainment security; private investigations; and integrated physical security systems. Career pathways in Commercial, Industrial, Correction services; Emergency, Alarm and Fire Management Services; Wardens, Law enforcement services and legal services are also discussed and explored dealing with global rules and regulations for policy and legislative instruments.

The new realities of our times simply require new thinking and better solutions. TransAfrica2000 with his strategic partners Homeland **HOME GROWN SOLUTIONS** Response and Emergency Management and Services (HREM) is the readiness solution for the 21ST century. The defining characteristic of the risk and threats of the new millennium is our main objective. This is due to an increasingly interconnected world and rapidly changing political, social, economic, and environmental realities.

Global terrorism, local crime wave, natural and ecological disasters, money market meltdowns, weapons proliferation, critical vulnerabilities in our physical and information infrastructure, and the spread of pandemics and epidemics facilitated by rapid global transport is our biggest challenge that must not be taken lightly treated with complacency and mediocrity which is Africa`s main predicaments, waiting for something to happening before response.

“THE CULTURE OF BEING REACTIVE THAN PROACTIVE”

Our well thought our strategy and solutions in convergences meeting global evolution influencing Ghana`s demand for safety and security is the ideal business and security tool platform for today's all-hazards approach to consequence management in Ghana and Africa in general.

Our partners, JVI and strategic specialists guiding our pool of qualified staffs has over 25 years in their respective fields and come from the broad spectrum encapsulating public safety; first response; corporate, civic and commercial security; government and military; contractor; cyber systems, information and technology security.
